## VII. Output Interface

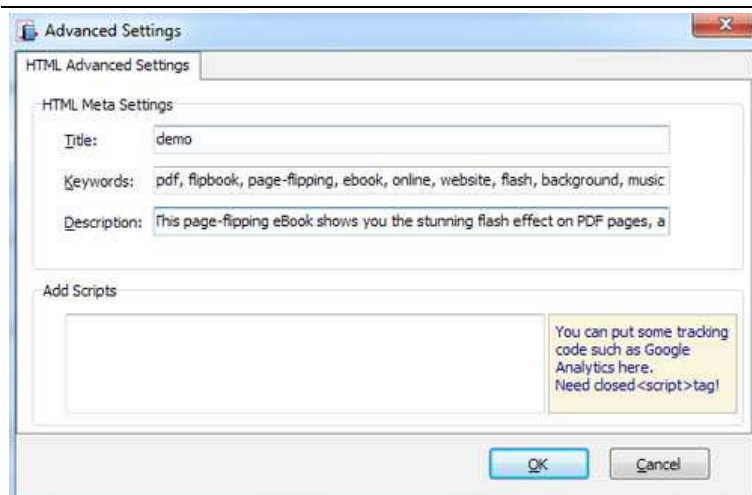

Click "Convert to Flipping Book" to enter into output interface:

### 1. HTML

This output type is for uploading created page-flipping ebook onto websites. You can define HTML Title and other properties by clicking "Advanced" button. Set Keywords, Description or even Script in the below interface:

## 2. ZIP

This output type is for compressing the created files into an integral ZIP package which can be sending out as attachment directly. You can also define HTML Advanced Settings by clicking "Advanced" icon. Your recipients just need to unzip the ZIP file and then they can view the HTML flipbook instantly:

## 3. EXE

This type is for outputting flipbook as a single executive file, easy storing and easy viewing:

You can also define Icon and Opening Window Size in Advanced Settings:

#### 4. APP

If you want to make executable application to run on Mac devices, you can output as "\*.app" format.

#### 5. Mobile Version

You can even output Mobile Version while choosing HTML or ZIP format at the same time. After creating mobile versions, you just need to output all files online (including HTML, SWF, "files" and "mobile" folders), then you can visit the flipbook page through your mobile browser.

#### 6. Burn to CD

After choosing output type, check option "Burn to CD", set "CD Writer", define "Disc title".

"How to make created eBooks available for others online", view details in this support page:

<http://www.pageflippdf.com/faq/how-to-share-my-flipbook-online.html>

At last click  button to output flipbook in your defined type.
